

Dear guests,

Welcome to my summer house. I hope you will have a fantastic holiday and take good care of my house while you are here. It means a lot to me that you have a good stay, therefore I have gathered some different points that may help improve your experience. It would mean a lot to me if you could leave a good review of the house on Novasol's website, provided that you have had a good holiday.

If you have suggestions for improvements, or if there are things you have missed in the house, you are very welcome to help me improve the experience for the next guests by sending me an email at danlarsen50@gmail.com. If you need help right now, please contact Novasol's customer service.

Indoor climate:

As the house is new and well insulated, it can get warm when the sun shines in. Make sure to ventilate well, or sleep with windows/doors slightly open. This especially applies to the loft areas, so some fans have been placed there if extra airflow is needed.

Car charger

Simply connect your own charging cable to the station, and charging should begin. If there are any issues, please contact Novasol and it will be resolved.

Hot tub and cold plunge:

Once the water is filled in the indoor hot tub, start the circulation and set the temperature, and the water will gradually heat up. It takes about an hour.

The cold plunge takes several hours to cool down, so if you plan to use it, I recommend starting it upon arrival. It must be filled using the water hose on the wall outside. Make sure the drain at the back is closed so the water does not run out.

NOTE: It is important that the water is reused in both the spa and cold plunge and that chlorine tablets are used. If the water is drained and refilled, there is a risk that the tank becomes overfilled and the sewer can no longer handle the water.

Pool:

I recommend washing thoroughly, and especially that children rinse their eyes as well. Even though it is a saltwater pool, which provides softer water, a lot of play and diving in the pool can still irritate some people's eyes.

Sauna:

Please allow about 1.5 hours to heat up the sauna. The ceiling is high, so it takes a bit longer to warm up. Expect that the sauna temperature will not get much higher than 75 degrees.

TV and Music:

When you are connected to the house Wi-Fi, it is possible to stream TV via your own apps on the TV.

Some have experienced that the sound has been missing on the TV in the living room due to the audio settings. If this happens, the sound will return if you turn it off at the switch and then turn it back on.

There are two Sonos speakers that you can connect to when you are on the house Wi-Fi.

Loft areas:

Unfortunately, it is not possible for the cleaning staff to access these areas, so if there is a bit of dust in the corners, you are welcome to use the handheld vacuum cleaners located there. A thorough cleaning is of course done where everything is taken care of, but it is not always possible to keep it down.

Outdoor table tennis:

Unfold the table by pressing in the orange handles and pulling it out. Remember to reattach the brackets and use the clips so it does not come loose. This is important as the table does not tolerate rain.

PlayStation 5:

Select guest user – you can now play the games available on the PlayStation. Please note that several of the games require you to use your own login, or create one, in order to play them. Charge the controllers via the USB port on the PlayStation.
